DATE MAILED: 02/02/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/775,447	Applicant(s) KUTNYAK, MARK	
	Examiner Gunyoung T. Lee	Art Unit 2875	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 November 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-17 is/are pending in the application.
- 4a) Of the above claim(s) 8-10 and 12 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-7, 11 and 13-22 is/are rejected.
- 7) ☒ Claim(s) 8-10 and 12 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 17 November 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on November 17, 2005 has been entered:
 - Claim 1 has have been amended;
 - Claims 18-22 have been newly added.
 - Claims 1-22 are still pending in this application, with claims 1 and 20 being independent.
2. The corrected or substituted drawings (Fig. 4, Fig. 6 and Fig. 7) were received on November 17, 2005. These drawings are approved.

Response to Arguments

3. Applicant's arguments regarding the objection on claims 8-10 and 12 filed November 17, 2005 have been fully considered but they are not persuasive, because the claim wording in claims 8-10 do not match with the "Acceptable Multiple Dependent Claim Wording" in MPEP § 608.01 (n). The objection is appropriate and is still pending.
4. Applicant's arguments regarding newly amended claim 1 filed November 17, 2005 are moot, because the amendment "a plurality of light sources each supplying" introduces a new additional structural limitation that has not been previously presented. The newly amended claim 1 is treated based on a new ground.

Art Unit: 2875

5. Applicant's arguments regarding the objection on claims 2-3 filed November 17, 2005 have been fully considered but they are not persuasive, the Merriam-Webster dictionary (in p. 508 of the 10th edition) defines the term "graphical" as "formed by **writing, drawing** or engraving". Thus, it is clear that the term "graphical" includes the configurations of alphabetic letters and numbers of types shown in the prior art and generic geometric shapes such as squares, triangle, and circles.

DETAILED ACTION

6. The claims must be given their broadest reasonable interpretation. See MPEP § 2111.

Claim Objections

7. Claims 8-10 and 12 are objected to under 37 CFR 1.75(c) as being in improper. In regards to claims 8-10, the claims do not follow the acceptable multiple dependent claim working as shown in MPEP § 608.01(n). Appropriate correction is required.

In regards to claim 12, the claim 12 is objected to as being dependent upon an objected base claim.

Accordingly, the claims 8-10 and 12 have not been further treated on the merits.

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. A preamble is not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure (see MPEP § 2111). The information in the preamble is not further given any patentable weight.

12. The functional statement that does not direct to structural limitations of an apparatus has not been given any patentable weight (see MPEP § 2114). The functional statements in the claims are not further given any patentable weight.

13. The motivation for combining or modifying the teachings of the prior art to produce the claimed invention does not need to come from the reference itself. See MPEP § 2143 - § 2143.03.

14. Claims 1, 11 and 13-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glatt (US 5,758,947) in view of Chien (US 5,570,946) and Mantha et al. (US 5,743,621) which is cited in the office action dated August 24, 2005.

15. Glatt discloses a safety helmet (Fig. 2).

Art Unit: 2875

16. In regards to claim 1, Glatt discloses:

- An inner core (Fig. 2, 12) of resilient, impact-reducing material (col. 2, lines 40-44);
- Wherein the core (Fig. 2, 12) has cavities (72, 74);
- An outer shell (Fig. 2, 11) overlying the core (12);
- Wherein the outer shell (Fig. 2, 11) has a substantially opaque outer surface except for at least two windows (76, 80) (col. 5, lines 27-31);
- Wherein the windows (Fig. 2, 76, 80) are disposed over the cavities (72, 74);
- A plurality of light sources (Fig. 2, 14) supplying a plurality of lighting elements (14);
- Wherein the light sources (Fig. 2, 14) being disposed in the cavities (72, 74), so as to be viewed through the respective windows (col. 5, lines 27-29);
- A timing circuitry (Fig. 5) for timing the on-off operation of the lighting elements within the light sources (14) (col. 4, lines 8-9), so as to create an effect of motion (col. 4, lines 23-25);

In regards to claims 11 and 13-17, Glatt further discloses:

- (Claim 11) at least two circuits (Fig. 5) for supporting the light sources;
- (Claim 13) a battery source (Fig. 2, 34) of power for supplying power to the light sources;
- (Claim 14) two windows (Fig. 2, 76) which are at least translucent (col. 5, lines 27-31) and are located at the front and back of the headgear, respectively, and light sources being positioned inside of said respective windows;

Art Unit: 2875

- (Claim 15) the outer shell (In another embodiment) is alternatively made of a translucent material (col. 5, lines 29-31);
- (Claim 16) an outer shell (Fig. 2, 82) being releasably secured (col. 4, line 67 – col. 5, line 5);
- (Claim 17) wherein the headgear (helmet) (Fig. 2) has a smooth outer surface and aerodynamic shape.

Glatt does not expressly disclose:

- A plurality of lighting elements within each light source (claim 1);
- At least one image that is disposed on each window and illuminated by said light sources so as to be viewed externally (claim 1), wherein the image is a graphical image (claims 15, 18).

In regards to a plurality of lighting elements within each light source, Mantha et al. disclose an illuminated safety helmet (Fig. 1) with a plurality of lighting elements (Fig. 6, 43) within each light source (40a, 40b).

In regards to the graphical image that is disposed on a window, Glatt does not expressly disclose the use of a graphical image on a safety helmet. However, Glatt discloses that the invented safety helmet can be used for recreational and occupational activities (col. 1, lines 13-14). Chien discloses a protective headwear having a graphical image (Fig. 1, 7 and Fig. 3, 74) that is coated on each of the windows and illuminated by the multi-colored light sources (col. 11, lines 2-5) so as to be viewed externally.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the plural lighting elements within each light source as shown in Mantha et al. and the graphical image illuminated by multi-colored light sources as shown in Chien for the safety helmet of Glatt to provide the emitting light with high intensity which illuminates through the graphical image(s) on the window. This will provide recreational activities (with various colors) or safety information, such as signals or signs, (with increased intensity) for better safety of the motorcycle rider.

17. Claims 2-4 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glatt (US 5,758,947), Chien (US 5,570,946) and Mantha et al. as applied to claims 1 and 18 above.

18. In regards to claims 2-4 and 19, Glatt, Chien and Mantha et al. disclose the invention substantially as claimed except for the windows with a flame shape image.

19. It would have been obvious to one of ordinary skill in the art at the time of the invention to form the windows in the shape of a flame, since it has been held by the courts that the change in shape or configuration, without any criticality, is nothing more than one of numerous shapes that one of ordinary skill in the art would find obvious to provide based on the suitability for the intended final application. See *In re Dailey*, 149 USPQ 47 (CCPA 1966).

20. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glatt (US 5,758,947), Chien (US 5,570,946) and Mantha et al. as applied to claim 1 above.

Art Unit: 2875

21. In regards to claims 5-7, Glatt, Chien and Mantha et al. disclose the invention substantially as claimed except for the windows being at least three times the area of any light-emitting element. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the windows at least three times the area of the light emitting element, since it has been held that discovering an optimum value of a result-effective variable involves only routine skill in the art. *In re Boesch*, 617 F.2d 272, 205 USPQ 215 (CCPA 1980).

22. Claims 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Glatt (US 5,758,947) in view of Chien (US 5,570,946).

23. Glatt was discussed in the rejection of claim 1 above.

24. Glatt discloses a safety helmet (Fig. 2).

25. In regards to claim 20, Glatt discloses:

- An inner core (Fig. 2, 12) of resilient, impact-reducing material (col. 2, lines 40-44);
- Wherein the core (Fig. 2, 12) has at least one cavity (72, 74);
- An outer shell (Fig. 2, 11) overlying the core (12);
- Wherein the outer shell (Fig. 2, 11) has a substantially opaque outer surface except for at least two windows (76, 80) (col. 5, lines 27-31);
- Wherein the windows (Fig. 2, 76, 80) are disposed over the cavity (72, 74);
- A plurality of light sources (Fig. 2, 14);

Art Unit: 2875

- Wherein the light sources (Fig. 2, 14) being disposed in the cavity (72), so as to be viewed through the respective windows (col. 5, lines 27-29);
- A timing circuitry (Fig. 5) for timing the on-off operation of the lighting elements within the light sources (14) (col. 4, lines 8-9), so as to create an effect of motion (col. 4, lines 23-25).

Glatt does not expressly disclose:

- At least one image that is disposed on each window and illuminated by said light sources so as to be viewed externally (claim 20), wherein the image is a graphical image (claims 21).

In regards to the graphical image that is disposed on a window, Glatt does not expressly disclose the use of a graphical image on a safety helmet. However, Glatt discloses that the invented safety helmet can be used for recreational and occupational activities (col. 1, lines 13-14). Chien discloses a protective headwear having a graphical image (Fig. 1, 7 and Fig. 3, 74) that is coated on each of the windows and illuminated by the multi-colored light sources (col. 11, lines 2-5) so as to be viewed externally. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the graphical image illuminated by multi-colored light sources as shown in Chien for the safety helmet of Glatt to provide the emitting light which illuminates through the graphical image(s) on the window. This will provide recreational activities or safety information, such as signals or signs, for better safety of the motorcycle rider.

26. Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over Glatt (US 5,758,947) and Chien (US 5,570,946) as applied to claim 20 and 21 above.

27. In regards to claim 22, Chien and Mantha et al. disclose the invention substantially as claimed except for the windows with a flame shape image.

28. It would have been obvious to one of ordinary skill in the art at the time of the invention to form the windows in the shape of a flame, since it has been held by the courts that the change in shape or configuration, without any criticality, is nothing more than one of numerous shapes that one of ordinary skill in the art would find obvious to provide based on the suitability for the intended final application. See *In re Dailey*, 149 USPQ 47 (CCPA 1966).

Conclusion

29. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gunyoung T. Lee whose telephone number is (571) 272-8588. The examiner can normally be reached between 7:30 - 4:00 PM.

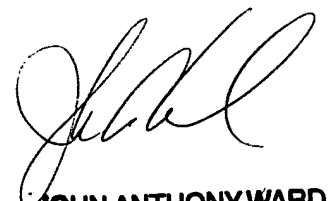

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra L. O'Shea can be reached at (571) 272-2378. The fax phone
